

EASYFIT TRANSMITTER

INSTALLATION INSTRUCTIONS

Easyfit Transmitter is supplied preassembled and configured to your specification.

The Easyfit Transmitter button plate is pre-drilled to support standard 50 to 50.8mm and 70mm PCD steering wheel bosses. The rear plate is additionally pre-drilled to suit 74mm PCD and can be used as a guide to gently drill through the button plate and/or spacer disk, if required. Use a 6mm HSS drill bit with light pressure and low speed, with the parts securely clamped.
